Subject: RE: Fishery Information Request

Melissa,
I have not fished in the area we looked at (specifically the marsh); However
there are many people that fish every day in redfish bay adjacent to that
site.

Beau

Subject: Fishery Information Request

Hi,

Last year you were very kind to go out to Ingleside and check out the
wetlands and species habitat near the Falcon Refinery/NORCO/MJP Resources
dock on Redfish Bay. This area is east of Ingleside, south of Aker Gulf
Marine, and north of the Brown & Root boat slip. It is just south of the
beached barge.)

The EPA has decided to go forth with a Hazard Ranking System (HRS) Package
on the Falcon Refinery site in order to propose it to the National
Priorities List. The HRS is a very thorough document.

I was wondering if you have fished in the area or know of anyone who has.
If you have fished in that area, I would like to request some additional
information...

1. have you photographed any fish that you have caught in that area? (If
you have photographed any fishing trip, could I get a copy of the photos?)
2. what time periods did you fish this area?
3. did you take the fish home and eaten it?
4. approximately how many adults and/or children ate the fish?
5. do you know of anyone else who fishes in that area? could I contact
them?

If you could help me out with this, I would greatly appreciate it.

Thank you,

Melissa Cordell
